

Ahmed Mattar

Data scientist, and Full stack software developer

33 El Nasser ST.,
Ard El Gameia, Imbaba
(+20) 1065698317
ahmed.m4business@gmail.com

Main Projects

Deploying machine learning with flask — *diabetes detection*

Using KNN algorithm to detect whether someone is having diabetes or no with 80% accuracy

For more details here is the link of the project:

<https://github.com/crybto/ml-with-flask--lab-3->

Building database for a website — *using flask and sqlite*

Working on a website to create typing by touch tutorials

For more details here is the link of the project:

<https://typingbytouch.com/home>

portofolio

For more projects regarding data science and machine learning::

<https://www.kaggle.com/notebooks?sortBy=dateRun&tab=profile>

For more projects regarding different programming languages:

<https://github.com/crybto?tab=repositories>

For clone of the typing touch fully created from scratch using flask and react follow the link:

<https://touchtypingclone.herokuapp.com/>

EDUCATION

Cairo university, Cairo, Egypt — *bachelor degree of commerce*

Oct 2011 - June 2015

Bachelor degree of business administration with a very good grade with honor and was in top 10 of my cohort

SKILLS

Mathematics.
Probability.
Fast learner.
Team player.

Programming SKILLS

Python.
Machine learning
JavaScript.
php.
Node.js
Django
Flask
React
SQL.

WORK EXPERIENCE

Arab Academy for Science,
Technology & Maritime
Transport - Teaching assistant -
part time - 03/2021 - till present

Madina Academy - Teaching
assistant - 10/2017 - till present

Freelancer - web developer,
data scientist, and finance
services - 01/2017 - present.
